Supervisor's Name: _____ Signature: _____ Email: _____	Phone No: _____ Date: _____
Co-supervisor's Name: _____ Signature: _____ Email: _____	Phone No: _____ Date: _____

SECTION 3 – OFFICE USE ONLY

WAM checked Assessor: _____

Entered in database

Comments: _____

Nominating a Thesis Topic

❖ *Student-developed topic*

Students may develop their own topic, provided that they have a WAM greater than 65. Students should locate an appropriate supervisor from within PV who will agree to supervise their topic. A one-page summary of the topic should be attached to this form before approaching a prospective supervisor.

Supervisors from other Schools of UNSW may only be allowed with permission from the Thesis Coordinator. A co-supervisor from within PV must also be organised by the student. For permission to have a UNSW academic from outside PV supervise your thesis, please email m.lenio@student.unsw.edu.au.

The Centre also encourages students who wish to do an industry-led thesis topic. In this case the mentor from industry would be the student's co-supervisor and the student would have to locate a suitable supervisor from within CPVE. A one-page summary signed by the industry mentor should be attached to this form before approaching a prospective supervisor from the Centre.

❖ *Thesis topics*

Thesis topics are available through the UNSW PV site. Students should negotiate directly with supervisors to arrange their thesis topic, and submit this form to the School Office once approval has been obtained by the supervisor(s).
